

# Highlights on Alumni Mentorship Program

Student Mentee Sharing

Alice So 蘇慧昕 (ENCS2014)

**Alice So 蘇慧昕** (ENCS2014)

Joining the Alumni Mentorship Program has sharpened my vision about my study and career paths and who I really am. I am currently a Year 2 student major in Environmental Conservation Studies. My mentor, Perry, graduated in the same programme of mine a few years ago. He knew very well about my programme and offered me different opinions. For instance, during our meeting, he thought I was a very quiet and shy girl who seldom talk or ask questions actively, so he told me what courses would suit me more and be easier for me to get a better grade.

He also has better ideas about what is happening in the field as well as what kind of people employers are looking for. He shared with me not only his own experience but also those of his friends in the industry. This kind of information helps me develop my study and career paths. I am most grateful to CIE for letting me participate in this mentorship programme.

A gathering with my mentor and friend (from L to R) Perry Yiu, Chan Wai Kwan and me.
