Overseas Scientific Research Exchange Programme

Objectives:
• To enrich cultural experience and develop independence, self-reliance, and sense of responsibility
• To expose students to a higher level of research techniques, and increase their scope of awareness to the large framework that makes up international science
• To collaborate with overseas academics and develop interpersonal skills and communication
• To nurture confidence in trying novel advanced techniques, and maintain a discipline of quality control when working on projects meant to be for an international readership

Activities:
• Training in a range of techniques and skills in the laboratory related to sample preparation and analysis, larval culturing in aquaria, field sampling and surveys
• Skills applied to many fields of biological sciences will be also provided
• Explore the culture, and city life of Taiwan
