

Appreciating Natural and Urban Landscapes in Northern Thailand

Objectives:

1. To enhance student's practical knowledge in agroforestry in mountain areas and horticultural practices in botanic gardens by professionals
2. To widen student's exposure to different forest systems and ecology in Asia
3. To build-up the sense of global citizenship by enhanced understanding on the importance of biodiversity protection and natural resources management in national parks

Programme Highlights:

- ✓ Professional workshops by professors in Thailand
- ✓ Cultural exchange with Thai people and students in Chiang Mai, Chiang Rai
- ✓ Study diversity of plants in National Parks of Northern Thailand and famous botanic gardens
- ✓ Visit the Long Neck Karen People and understand Northern Thailand hill tribes culture
